

B2
cont

means for displaying a second program corresponding to the selected interactive program listing in at least a portion of the display, in response to receiving the selection from the user.

B3

21. (Amended) An interactive media guide comprising:

a video display controller; and

a microprocessor programmed to:

direct the video display controller to display at least one interactive program listing on a display simultaneously with at least a substantial portion of a program;

allow a user to select the at least one interactive program listing; and

direct the video display controller to display a second program corresponding to the selected interactive program listing in at least a portion of the display, in response to receiving the selection from the user.

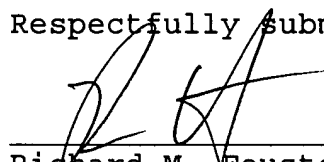

REMARKS

Applicants have amended claims 1, 11 and 21 as set forth above and in the attached appendix. These amendments are fully supported and justified by applicants' specification and drawings. No new subject matter has been added.

CONCLUSION

Applicants respectfully submit that this application is in condition for allowance. Prompt consideration and allowance of this application are respectfully requested.

Respectfully Submitted,

Richard M. Feustel, Jr.

APPENDIX
CLAIM AMENDMENT MARK-UPS

1. (Amended) A method for allowing a user to browse program listings while viewing at least a substantial portion of a program on a display comprising:

displaying at least a substantial portion of a program in at least a portion of the display;

displaying at least one interactive program listing on the display simultaneously with the at least a substantial portion of the program;

allowing the user to select the at least one interactive program listing; and

displaying a second program corresponding to the selected interactive program listing in at least a [part] portion of the display, in response to receiving the selection from the user.

11. (Amended) A system for allowing a user to browse program listings while viewing at least a substantial portion of a program on a display comprising:

means for displaying at least a substantial portion of a program in at least a portion of the display;

means for displaying at least one interactive

program listing on the display simultaneously with the at least a substantial portion of the program;

means for allowing the user to select the at least one interactive program listing; and

means for displaying a second program corresponding to the selected interactive program listing in at least a [part] portion of the display, in response to receiving the selection from the user.

21. (Amended) An interactive media guide comprising:

a video display controller;

[a display;] and

a microprocessor programmed to:

[direct the video display controller to display a program in at least a portion of the display;]

direct the video display controller to display at least one interactive program listing on [the] a display simultaneously with [the] at least a substantial portion of a program;

allow a user to select the at least one
interactive program listing; and

direct the video display controller to display a second program corresponding to the selected interactive program listing in at least a [part] portion of [a] the display, in response to receiving [a] the selection from the user [of the at least one interactive program listing].
